OneExpert CATV

A full-featured handheld for technicians at any skill level

OneExpert[™] CATV helps field technicians fix problems right—the first time. A technician-friendly interface and OneCheck[™] automated tests ease complex tasks with a simple dashboard that shows clear pass/fail results. And its future-proof modularity ensures years of use supporting CATV networks.

Comprehensive Tools Increase Productivity

We built expertise into OneExpert so that technicians at any skill level can quickly optimize performance. With a modular platform that adapts easily to rapidly changing technologies, OneExpert CATV is:

- Simple Auto channel identification eliminates channel plan build, maintenance, and deployment overhead and enables automated testing without the potential for channel plan related test failures
- Fast OneCheck uses powerful processing and exceptional speed to make more complete testing practical: a tech can run a comprehensive test, including MER and BER on all channels, in about a minute
- Powerful More intelligent, powerful algorithms running in the background while testing enables the meter to point out any problems and suggest next troubleshooting steps

Benefits

- Simplifies and speeds testing and troubleshooting
- Improves compliance and audit performance
- Reduces rework
- Turns any technician into an expert

Features

- Real-time channel identification eliminates the need for channel plans and plan-related errors
- 32x8 DOCSIS® 3.0, DOCSIS 3.1, WiFi, 1 Gigabit Ethernet capable, and TrueSpeed™ option
- Field-exchangeable DOCSIS/RF module
- A unique dual-diplexer design supports transition to extended return band
- WiFi 2.4/5 GHz, wireless personal area network, and StrataSync[™] enabled
- Simultaneous ingress and downstream testing
- Optional fiber scope and power meter
- Optional ISDB-T Module

Applications

- Troubleshooting QAM carriers/home networks
- Verifying WiFi in 2.4 GHz and 5 GHz networks
- Testing Gigabit DOCSIS services
- Installing PON/RFoG including inspection, power levels, and RF performance
- Optional QAM video MPEG analysis for RPD activation
- Optional home leakage testing
- Network maintenance with forward and reverse sweep
